UNIVERSITY RADIOLOGY

Leaders in Subspecialty Imaging

Scheduling: 732-390-0033

UniversityRadiology.com

This non-invasive, pain-free test measures the amount of calcified plaque in the coronary arteries. A high amount of plaque indicates an increased chance of heart attack. Since most insurance companies do not cover this test, University Radiology offers cardiac calcium scoring in our Cherry Hill, East Brunswick, Elizabeth, Riverdale, Somerset and Warren locations at the self-pay price of $99.
